MỤC TIÊU NGHỀ NGHIỆP

I aspire to accompany the company in the long run, contributing my game programming skills, sense of responsibility, and proactiveness.
I am always eager to learn, driven to improve myself, and committed to delivering practical value to both products and the team.
My goal is to become a reliable member who can be entrusted with any stage of the game development process.

World of Islands

solo dev

Title: Fantasy Survival RPG – Open World Island
Duration: 06/2024 – Present
Role: Solo Indie Game Developer
Technologies: Unity (C#), VFX Graph, Shader Graph, Addressables, Blender, Git, Photoshop
Project Description:
A solo-developed fantasy survival RPG set in an infinite, procedurally generated island world. The project focuses on both technical depth and engaging gameplay systems, simulating a real game studio workflow.
Key Features:

- Infinite open-world islands, procedurally generated using noise and dynamic chunk loading.
- Advanced combat system: combo chains, frame-based collider detection, root motion, knockback effects.
- Custom-designed FSM AI for monsters (Passive, Neutral, Aggressive).
- Fully customized UI/UX: item, skill, inventory systems, character color palette, etc.
- Dynamic day-night cycle with animated sun and moon, auto-updating ambient skybox.
- Performance optimizations: Level of Detail (LOD), object pooling, dynamic chunk system.
- Addressables system for all resources and efficient lazy loading.
- Managed the entire game development pipeline independently, from design to deployment, simulating a mini studio workflow.

KỸ NĂNG

Unity (C#)	Proficient in problem-solving and algorithmic thinking (e.g., A*, noise map generation). Applied various design patterns: Factory, Strategy, FSM, Observer, Pooling. • Experienced in implementing gameplay logic, collider interactions, animation events,Editor.
Shader & VFX	Utilized VFX Graph and Shader Graph to create skill and environment effects. Designed and implemented simple fire, explosion, dust, and smoke effects to enhance gameplay.
3D Modeling (Blender)	• Created custom low-poly models for characters, monsters, and buildings to enable rapid prototyping. • Produced basic animations, rigging, and handled UV mapping.
